- Are our musical preferences shaped in utero?
- Is there a cutoff point for acquiring new tastes in music?
- What do PET scans and MRIs reveal about the brain's response to music?
- Is musical pleasure different from other kinds of pleasure?

This Is Your Brain on Music explores cultures in which singing is considered an essential human function, patients who have a rare disorder that prevents them from making sense of music, and scientists studying why two people may not have the same definition of pitch.
