The year is 2001. Two young Indian girls arrive in the U.S. for the first time, to attend graduate school and be room-mates. One's a non-cook. The other's kitchen skills are strictly basic. As luck would have it, both are consummate foodies. And it's not just advanced Molecular Biology they'll come to tackle—the daily challenge is to feed their stomachs and souls on a thinner-than-spaghetti budget! Part memoir, part cook-book, Roomies/Foodies compiles the experiments and culinary adventures of Lux and Meg as they stick to their resolve of eating only non-boring food! Written in a slick, hip, conversational style, this well-organized handbook bubbles with anecdotes, tips, tricks, cheater's methods and over 60 lip-smacking recipes. Spanning an easy-to-moderate spectrum of skills, Meg and Lux's "Eureka moments" in their own kitchen will help spare YOU some painful trial and error in yours!
